

Hackathon Attestation

Empowering Sustainable
Development with Attestation-based
Donations

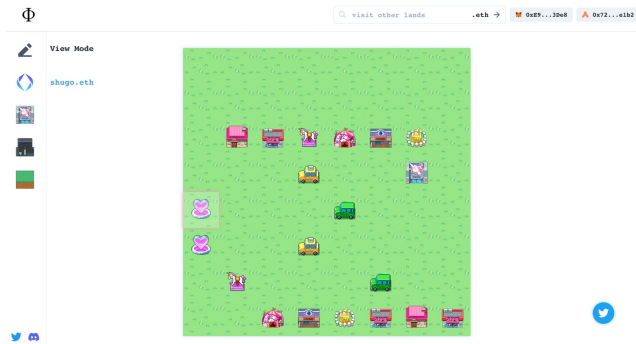

<https://eth-global-tokyo-chi.vercel.app/>

post-hackathon... Its quite hard

1. Not Enough Money
2. Tracking is Difficult from sponser-side
3. Unsure about user-interest

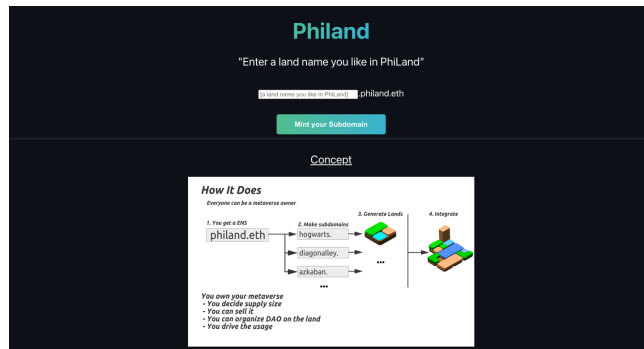

In My Case

NFT HACK2022

<https://ethglobal.com/showcase/phi-h>

BUILDQUEST

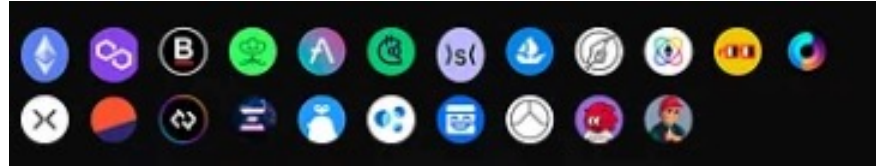

<https://ethglobal.com/showcase/phi-land-2f6hf>

1 year later PHILAND

1. Attestation from Strong Investors:

2. Early Donations from Potential Users:

3. Strong Financial Incentives upon Reaching Milestones:

My Hackathon Goal

Bring the post-hackathon project closer to a similar env

Evaluating Phi Land: A Virtual Experience Built on Ethereum

Closed

hackathon attestation by You Core

↑ Share ...

In this evaluation, we will explore Phi Land, a virtual experience built on the Ethereum blockchain, accessible at <https://ethglobal.com/showcase/phi-land-2f6hf>. We will analyze the user experience, the integration of blockchain technology, and the platform's potential for growth and development. Our assessment will focus on the active user base, the sustainability of continuous development, and the team's responsiveness to user feedback.

Donator

 ETHGlobal

Win-win situation

Todo:

- make donation
- vote snapshot

Benefit

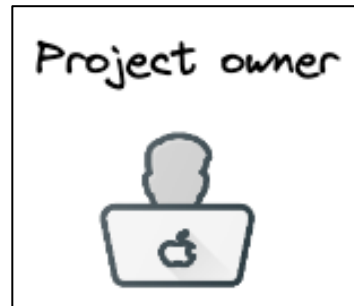

- ensures that donations are only released when projects achieve specific milestones
- financial support from early-phase
- make attestation

Todo:

- create project
- keep build

Benefit

- attestation from strong investors/sponser
- early donations from potential users.
- strong financial incentives tied to milestones

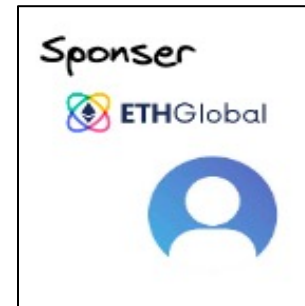

Todo:

- make attest
- open oSnap

Benefit

- monitoring and evaluating the progress of projects
- check user demand

Thank you for listening

We believe

hackathons generate numerous promising projects with immense potential.

Our aim is

expanding and becoming more impactful by offering a supportive ecosystem that encourages success and guarantees transparent donation.

.

OP Attestation:

“Sponsors/Investors” can make attestations about project owners with their Ethereum addresses. This process validates the project’s credibility and ensures that only trustworthy projects can receive donations.

oSnap:

Our product leverages oSnap’s benefits, such as decentralization, security, flexibility, and interoperability, **to facilitate an efficient and reliable donation system.**

Donations are **only released when projects “achieve specific milestones”**

Gnosis Safe:

This platform enables secure funds management, **ensuring that “donations are safely” held until projects meet their milestones.**
